Manage Storage Accounts

Azure Storage Data Objects

- Contains all Azure storage objects
- Unique namespace access to storage resources
  - Ex: https://stbloblstorage001.blob.core.windows.net/demo/az-104-outline.pdf
- Highly Available
- Secure & Scalable

Data Types:

- Blob
- File
- Queue
- Table
- Disk

Types of Storage Accounts

- General-purpose v2
  - All types of Azure storage data objects, supports Data Lake Gen 2 data, recommended for most use cases
- General-purpose v1
  - Legacy accounts for blobs, files, queues and tables (upgrade to v1 when possible)
- BlockBlobStorage
  - Premium performance only for BlockBlobs and AppendBlobs, useful for scenarios with low storage latency, higher transaction rates, and the data objects are smaller.
- FileStorage
  - Premium tier performance for Files, only stores files, enterprise applications or high-performance scale applications
- BlobStorage
  - Legacy Blob only storage account (use General-purpose v2 whenever possible)

Azure Storage Endpoint for BlobStorage
